S-UT50 Ultrasonic Pressing Machine

Description:-

Mainly used in the lace clothing, surgical gown, synthetic filter bags, hair decorations, satin packaging, raincoat, tablecloth, bedsheet, pillowcase, quilt cover, handkerchief, ribbon, disposable medical gowns, hook and loop cutting, non-woven bags, and shower curtains.

This machine is using ultrasonic energy to cut, weld, seal, seam perforating, and emboss. It removes the need of needle stitching and sewing thread, reducing material cost with higher production efficiency. It will cause no stitch wrinkle and no shrinkage. Very convenient use and user friendly. It does not produce any spark, and smoke, which is safe for production. Adopts the use of durable alloy rollers that are replaceable for various roller design of options.

Technical Parameters:-

Output	1500W
Frequency	20 Khz
Voltage	220V 50-60Hz
Roller Size	50mm
Working Speed	0 - 20 m / min
Packaging Size	127 x 65 x 130 cm
GW	110 kg
