

An affordable automated spreading solution that assures material rolls weighing up to 125 kgs (276 lbs.) are spread without tension and edges are aligned perfectly.

The XLs125 is designed for maximum performance, repeatability and productivity.

Available for left- or right-hand operation.

Cradle feed system provides tension-free spreading

Intuitive graphical touch-screen simplifies operator training and use

GERBERsreader XLs125

Get exceptional quality and performance in a tension-free spreading system at an affordable price.

Achieve maximum performance.

- The GERBERsreader™ XLs125 offers the flexibility for a wide variety of applications.
- Designed for maximum performance, repeatability and productivity.
- The XLs125 spreads woven or knit materials in roll or flat-folded form.
- Supports most common spreading modes.

Reduce raw material costs.

- The XLs125 ensures predictable, tension-free spreading of material.
- Provides accurate and consistent spread length.
- Accurately aligns material edges so parts can be nested closer to the ends and edges of material to optimize material utilization.
- Repeatability insures more accurate cut pieces and lower rejection rate in the sewing room

Experience reliability.

- The XLs125's reliable, robust construction and strength of design ensures minimal downtime in typical use and easy maintenance with existing resources.

Enjoy ease of use.

- Material roll cradle feed system tilts automatically for easy material loading and unloading.
- The XLs125 also features a simplified icon-driven user interface that is easy to learn and easy to train new users to operate.
- Available in English, Spanish and simplified Chinese.

Choose an affordable investment.

- The XLs125 provides a new low total acquisition cost by offering the most affordable purchase price ever.
- Low installation, training and other one-time costs.
- Low ongoing costs for parts and maintenance labor.
